PG Solar integrates high-quality lithium-ion battery systems with your solar system to store excess energy production. This stored solar electricity can power your ...

Energy storage is rapidly become more and more relevant due to the increasing renewable energy fraction in the grid, the rise of photovoltaics and the increase ...

Early off-grid systems relied on simple charge controllers and basic battery banks, while modern BESS implementations incorporate advanced battery management systems, predictive ...

Explore our Mobile Energy Storage System -- high-capacity, portable, and off-grid ready. Perfect for industrial, commercial, and renewable energy applications.

As a Swiss Engineering, Procurement and Construction (EPC) specialist, we implement customised, modular battery storage solutions that increase your ...

Switzerland's largest battery storage system has gone into action stabilising the electricity network for transmission grid operator Swissgrid, asset ...

Battery storage systems are crucial for the energy transition. Find out how Swissgrid is driving forward their integration into the grid.

BESS swiftly balance fluctuations in the electricity grid and stabilise grid frequency. They ensure security of supply while seamlessly integrating electricity production from wind and solar ...

Flexbase Group has begun construction on what could become one of Europe's largest flow battery storage installations, breaking ground on an 800 ...

LMB was developed to meet the need for cheap and robust large battery systems for the grid. Its design

Swiss off-grid energy storage system

consists of three layers of liquid metal kept at a high temperature, all three active components being ...
