-----

In a separate move, PETDE signed a deal with Manaret Shahbaa in mid-September to build a 100-MW solar power plant in central Syria. Qatar is also taking part in ...

ors of renewable resource potential Solar PV: Solar resource potential has been divided into seven classes, each representing a range of annual PV output per unit of capacity (kWh/kWp/yr). The bar ...

This infographic summarizes results from simulations that demonstrate the ability of Syria to match all-purpose energy demand with wind-water-solar (WWS) electricity and heat supply, storage, and ...

Even with some waivers for humanitarian programs, it was difficult to bring in resources and materials to fix Syria's critical infrastructure -- especially ...

Al-Gihaz Holding plans 210 MW solar plant with 827 MWh battery storage in Syria to strengthen power supply reliability.

In the informative video below, Dr. Shadi Kalash highlights priority areas for detailed analysis and provides actionable recommendations, such as ...

Syria's renewable energy landscape is evolving, but balancing wind/solar generation with storage remains critical. Discover how optimized energy storage ratios could unlock stability in Syria's power ...

This composition highlights Syria's significant dependence on fossil fuels, which poses concerns for both climate change and localized air pollution, making a ...
