The present work examines in an exemplary approach the radioecological footprint of wind turbine production and operation in a life cycle analysis. The results help to identify ...

From illegal bird deaths to radioactive waste, wind energy poses serious environmental risks that the wind lobby would prefer you ...

Wind turbines generate power from the rotation of large aerodynamic bodies, the blades, which are set in motions by the relative speed between the air and the blades ...

Here I will give a quickie overview of a radiation source that most people have never heard about. Lobbyists and other politically correct parties paint industrial wind energy ...

One of these claims is that wind turbine blades emit environmental pollutants that harm people and farmland. In late January ...

The amazing conclusion is that over the lifetime of a wind project (20 years), wind energy produces more radioactive waste per MWH than a nuclear facility! So we've lifted ...

However, the debate often involves incorrect, inaccurate, and misleading claims. Wind turbines have an excellent record of safety, and a significant body of research indicates ...

Because wind turbines emit no radiation, an endless number is necessary. All of this adds up to around 78 deaths per year from air pollution and accidents at that one coal plant, based on a ...

Does Wind Blade Power Generation Cause Radiation? The Shocking Truth Unveiled When Wind Turbines Meet Radiation Myths Let's address the elephant in the room first: wind turbines don't ...

The blades of wind turbines emit radiation

Multiple studies have found that the electromagnetic fields (EMFs) generated by wind turbines are lower than those generated by ...
