The International Electrotechnical Commission (IEC) proposed a new communications standard for the wind power industry aiming at providing a common communication approach for wind power plant ...

Wind power developers are pro-active in the early planning stages of facilities to quantify and minimize any disruption to existing telecommunications networks

Confined spaces in wind turbines present risks such as limited ventilation, extreme heat, and exposure to hazardous gases, creating a potentially deadly environment for anyone working ...

Groups of wind turbines often appear as clutter to the ATC radar system, which makes it difficult to track planes en route. This safety concern can ...

The presentation will give attention to the requirements on using windenergy as an energy source for powering mobile phone base stations.

Jan 13, 2022 · We investigate the use of wind-turbine-mounted base stations (WTBSs) as a cost-effective solution for regions with high wind energy potential, since it could replace or even ...

Due to the potential for interference to television signals in some areas surrounding the wind farm, it is proposed that Renewable Power Ventures investigate and rectify any interference to television ...

Measurements suggested that the intensity of the EMF at the base of the turbines, in varying wind conditions, was relatively low and well below both international and national safety limits ...

The telecommunication services included in this are those that have demonstrated to be more sensitive to nearby wind turbines: weather, air traffic control and marine radars, radio navigation systems, ...
