A study was done, at the national level, which will allow the development of an energy policy for Timor-Leste. The study was concluded on the 29 May and analysed several sources available in our ...

Results of wind speed simulation from January to December 2014 are used as input data to estimate wind energy. The Weather Research and ...

This research aims to design and implement a hybrid system of solar cells and wind turbines based on IoT controller. The study begins with an analysis of local climate conditions and energy needs.

The Global Wind Atlas is a free, web-based application developed to help policymakers, planners, and investors identify high-wind areas for wind power generation virtually anywhere in the world, and then ...

To access additional data, including an interactive map of global wind farms, a downloadable dataset, and summary data, please visit the Global Wind Power Tracker on the Global ...

---We will take action to ensure that by 2015 everyone in Timor-Leste will have access to reliable electricity 24 hours a day. This will be achieved through investment in new power plants and ...

Mooreast said it will conduct due diligence and assessment of locations off Timor-Leste's coastline that would be suitable for development of projects to generate energy from floating wind, solar, ...

The project, which is expected to produce 50 megawatts (MW) of power, is part of the government's alternative energy resources. "Unlike Baucau ...

Singapore-based Mooreast has started feasibility studies to develop up to 500 MW of floating renewable energy projects in Timor-Leste in Southeast Asia.

Technology Scope: The assessment will cover potential offshore locations along the Timorese coastline for

harnessing energy from various ...
