---

The cumulative capacity of installed wind power worldwide amounted to approximately \*\*\*\*\* gigawatts in 2024. Onshore wind power ...

The Global Wind Power Tracker (GWPT) is a worldwide dataset of utility-scale, on and offshore wind facilities. It includes wind farm phases with capacities of 10 ...

Wind power's total cumulative installed electricity generation capacity has increased rapidly since 2000, and continues to expand faster than any other ...

Wind, nuclear, hydro, and solar together account for more than one-third of capacity. 468,582 MW of new generation capacity is under development in the United States, which is comparable to the total ...

In 2017, a total of 15,680 MW of wind power was installed, representing ...

Total wind (on- and off-grid) electricity installed capacity, measured in gigawatts. This includes onshore and offshore wind. This is the citation of the ...

The previous editions and complete electricity generation and capacity dataset from 2000 onwards are available for download on the Data and Statistics web pages.

Using three different sources of data and turbine power calculated for more than 126,000 sites in the United States, the toolkit provides powerful information for ...
