Solar and storage to lead record-breaking 86 GW of new U.S. capacity in 2026 From Texas-sized utility projects to skyrocketing residential battery attach rates, 2026 marks the year solar ...

Solar and storage dominate U.S. power growth in 2025, cutting costs, boosting jobs, and securing America's clean energy future.

Standalone storage made up nearly 30 GWh of new capacity added in 2025, while storage paired with solar accounted for 20 GWh. The residential energy storage sector added 3.1 GWh in ...

Energy storage systems, mostly large batteries, are important because they help store solar and wind power for use when the sun isn't shining ...

The U.S. energy storage market delivered a record-breaking quarter in Q3 2025, installing 5.3 GW nationwide and pushing year-to-date additions ...

According to the U.S. Energy Storage Market Outlook Q1 2026 (ESMO), released by the Solar Energy Industries Association (SEIA) and Benchmark Mineral Intelligence, utility-scale storage ...

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW of new utility ...

The residential energy storage sector added 3.1 GWh in 2025, marking a 51% year over year increase. Expansion of virtual power plant programs in states like Massachusetts, Texas, ...

Solar and battery storage are set to account for 79% of 86 GW of new utility-scale capacity planned in the United States in 2026, marking the largest annual increase in more than two decades ...
