GPO-3 / UPGM203: Unsaturated polyester glass mat laminate with excellent processability, high mechanical strength, and superior electrical properties; features outstanding arc resistance and ...

UPGM (Unsaturated Polyester Glass Mat) is rigid insulation material made by alkali-free glass mat impregnated in unsaturated polyester resin and additives, cured by heat and pressure.

UPGM203 rigid lamination sheet is made of high-grade unsaturated polyester resin (UP) connected with glass mat reinforcement, and then pressed at high temperature to obtain a multivalent electrically ...

Summary: The UPGM203 electrical polyester board plays a vital role in modern inverter cabinet design, offering exceptional insulation and thermal stability. This article explores its industry applications, ...

After nearly 20 years of development, our company has become the most important manufacturer of UPGM203 materials. Our products have passed UL certification ...

?Can be used electric cabinet and enclosure,busbar insulator,electrical insulator. ? We are manufacturer,since 2006 more than 10 ...

Polyester profiles are used in inverter cabinets, frequency converter cabinets, electrical cabinets, special transformers, reactors, large dry-type transformers and so on.

UPGM203 is IEC standard and GPO-3 is NEMA grade. It is kind of rigid plate insulating material, made of alkali-free fiberglass mat impregnated with ...

Ketonolic® GPO-3 UPGM203 Sheet Ketonolic® GPO-3 Sheet also called UPGM203, it is a standard electric insulating materials with excellent arc ...

Upgm203 processing manufacturer for inverter cabinet

The composition of UPGM203/GPO-3 unsaturated polyester glass fiber mat reinforced laminate is based on alkali-free glass fiber mat + unsaturated polyester resin, and functional additives are used to ...
