-----

According to NXP, the wireless ultra-wideband battery management system, or UWB-BMS for short, simplifies the assembly of electric vehicles. It ...

This research paper looks at the Ultra-Wide Band (UWB) communication protocol for wireless BMS, considering UWB's efficiency low latency and robust Radio Frequency (RF) ...

NXP Semiconductors, the trusted partner for innovative solutions in the automotive market, has unveiled its new, industry-first wireless battery ...

NXP Semiconductors' Ultra-Wideband (UWB) wireless battery management system (BMS) simplifies EV assembly, enables higher energy density, and decouples ...

Wireless communication within battery packs is a breakthrough technology enabling greener, safer and more efficient electric vehicles. This ...

NXP's Ultra-Wideband (UWB) wireless BMS simplifies EV assembly and enables higher battery energy density for faster time to market.

NXP Semiconductors N.V. has unveiled its new, industry-first wireless battery management system (BMS) solution with Ultra-Wideband ...
